LARCOLITE

WASHABLE WALL FINISH

DRIES IN 1 HOUR

This modern synthetic finish will cover in one coat, most any surface — wallpaper, painted or new plaster, building tile, brick, wallboard or cement. It brushes swiftly and easily, and dries in one hour. It has no offensive odor, and a whole room may be done and put in use in no time.

LARCOLITE is economical. It comes ready for use and one gallon will cover 500 to 600 square feet. It may be applied directly over calcimine, casein or resin emulsion paints.

LARCOLITE

1-HOUR DRY WASHABLE WALL FINISH

THE MODERN IDEAL
FINISH FOR WALLS, CEILINGS
AND WALLPAPER

LARCOLITE HAS THESE ADVANTAGES:

1. It is easy to apply.
2. It has no objectionable paint odor.
3. It requires no undercoat.
4. It is readily washable with soap and water.
5. It dries in one hour.
6. It dries to an even, velvet flat finish.
7. It is very economical. One gallon will cover 500 to 600 square feet.
8. It covers in one coat over practically any surface, including wallpaper.
9. It may be applied over calcimine.
10. It may be applied by brush or applicator, and tinted with oil colors.
